MEMORANDUM FOR: Chief, Arms Control Intelligence Staff

FROM: Director of Central Intelligence

SUBJECT: Nuclear Testing

1. Last Friday I raised with DepSecDefense Taft the subject of your package on nuclear testing and left it that I wanted to see the AFTAC study.

2. Today with Secretary Weinberger at breakfast I returned to the subject and showed him the article from Science magazine which referred to the existence of the AFTAC study and the dispute within the government. Taft said that he had checked and the AFTAC study was being completed and the DIA study on non-seismic evidence will be completed in about six weeks. He had been told that I wanted both studies together. They agreed to have the AFTAC study sent to me right away. I said I thought we ought to wait until the DIA study had been completed and then look at the whole picture and decide how best to address it.

3. Meanwhile, I understand we should be thinking about the best person to succeed as chairman of the JAEIC. I'd like to see suggestions that you may have and I plan to ask [redacted] as well as the appropriate person in Defense, for suggestions.
